

Data Analytics

The Best Place to Work.

Objective:

Provide a snapshot of the current job market as it relates to the Data Science Field in the US job Market.

- Where are the most opportunities?
- Who is hiring?
- Where can I utilize my skills? Python?
- Where are the most competitive salaries offered?
- How much have salaries increased over the past year?
- Where is the best place to pursue a career?

Hypothesis:

The best place to pursue a career in data science and data analytics is New York City.

Methodology:

- ✓ Using an API, gather current live job postings
- ✓ Categorize listings into Data Science or Data Analyst roles
- ✓ Aggregate outside datasets for salaries, cost of living, and other analytics
- ✓ Summarize and analyze the findings
- ✓ Rank each location based on criteria

How do we define “Best”?

Lowest Score Wins!!!

Ranking System

1. Job Openings per City
2. Python Skills by Job Postings
3. Salary by City
4. YoY Salary Increase by City
5. Cost of Living by State

Challenges and Limitations

- Finding open APIs to be used for minimal costs (with limited time)
- Accessing current/relevant data
- Subjective grouping of Analysts vs Data Scientist
- Inconsistent data

Areas of Opportunity/Next Steps

- Use multitude of sources for job data / expand the sampling
- Gather additional information such as reviews and industry ranking
